Hyderabad, Telengana, India | aditya200702@gmail.com | [linkedin.com/in/aditya200702](https://www.linkedin.com/in/aditya200702)

PROFESSIONAL SUMMARY

AI Business Analyst and Deputy Product Owner with 2+ years delivering enterprise GenAI products in a regulated pharmaceutical environment. Own two GxP-rated AI platforms serving 19,000+ combined users and act as engagement SPOC for a portfolio of 95+ AI use cases — spanning requirement elicitation, use case qualification, solution design and release management.

CORE SKILLS

AI & Automation Platforms: Microsoft Copilot Studio, M365 Copilot, Dify, Unify+, AWS AI Workbench, GAIN, AI agent platforms

Product & Delivery: Product ownership, backlog prioritization, roadmap planning, release management, Agile/Scrum, SDLC, UAT

Business Analysis: Requirement elicitation, use case qualification, process optimization, stakeholder management, user stories

Technical & Governance: Prompt engineering, LLM/RAG solution design, low-code/no-code development, GxP-regulated delivery, validated systems

PROFESSIONAL EXPERIENCE

Novartis Healthcare Pvt Ltd

Hyderabad, India

Specialist – APD AI Use Case Engineering (AI Business Analyst / Deputy Product Owner)

Jul 2025 – Present

- Own end-to-end delivery of enterprise AI use cases across Operations and Global Functions — demand intake, requirement gathering, solution design, validation and production release.
- Deputy Product Owner for two GxP-rated, organization-wide AI platforms; manage backlog, release scope and stakeholder alignment across business, engineering and quality teams.
- Build solutions on Copilot Studio, Dify, Unify+ and AWS AI Workbench, converting manual business processes into automated workflows with measurable efficiency gains.

Junior Prompt Engineering Specialist (Business Analyst – AI Delivery)

Aug 2024 – Jun 2025

- Delivered tailored GenAI use cases for Operations and Global Functions users with no-code/low-code tooling in Dify and Copilot Studio, driving process efficiency gains.
- Translated business problems into structured prompt architectures, evaluation criteria and acceptance tests, improving output reliability for production use cases.

KEY PROJECTS

Translate AI — Deputy Product Owner

Jul 2025 – Present

- GxP-rated enterprise translation platform used by 14,000+ active users. Own release planning, prioritize high-demand features and coordinate engineering, quality and business teams to deliver on schedule.

Privacy AI — Deputy Product Owner

Jun 2025 – Present

- GxP-rated privacy compliance platform serving 5,000+ active users. Manage product maintenance and roadmap, prioritizing incoming demand against evolving regulatory and business needs.

Dost — Business Analyst

Jun 2026 – Aug 2026

- Conversational finance agent answering internal finance queries and routing users to the right finance tool for each task. Gathered requirements, mapped tool-selection logic and defined conversation scope — cutting finance support tickets by 40%.

GAIN — Engagement SPOC, Operations & Global Functions

Aug 2024 – Present

- Single point of contact for AI platform engagement across Copilot Studio, GAIN, Unify+ and custom development, managing 95+ use cases and 70+ paying business stakeholders.
- Lead use case intake, requirement gathering and platform selection; drive adoption through hackathons, demos and onboarding events.

VelociS — Business Analyst

Aug 2024 – Jun 2025

- In-house AI accelerator generating SDLC artifacts. Delivered Phase 1 as BA — gathered cross-functional requirements, defined scope and acceptance criteria, and coordinated testing through release, streamlining development workflows by at least 30%.

EDUCATION

SRM Institute of Science and Technology, Vadapalani Campus

Sep 2020 – Jun 2024

B.Tech, Computer Science — Artificial Intelligence and Machine Learning

GPA: 9.04 / 10
